## Happy Potluck App:

It is a useful app for those people who like to plan and meet with people from different culture, different favorite. First of all, they can coordinate potluck with a group or several people. They can register based on the criteria and culture of a group. Secondly, using the app, they can find the location which is providing by our system (ensuring the safety and easy access for all people.). Our system would require a personal background check, and it keeps all people in a secure situation. Also, users can choose a type of group based on their preference. The application is filtering out irrelevant results by the favorite preference algorithm. Thirdly, they can attend and pay for the food if they would like to order something else on the application. Therefore, this application is a convenient application that helps many people to get together. It also improves the social networks/spiritual communication whiling having a conversation with different people. The app's recommendation can help a lot of people who want to make friends, improve their social skills and encourage in their life.
