

Service → axios / ajax / jquery

```

fun ( ) {
  return "end point" + header
}
  
```

mixins → reuse function

```

import formMixin from ".../mixins/formmixins"
mutation = { SET_EVENTS() { } }
  
```

store →

```

module {
  getter()
  actions {
    create
    commit
    fetch
  }
}
store.js → export default new Vuex.Store({})
  
```
